

INTERNATIONAL SYMPOSIUM ON PROTEOMICS BEYOND IDS... AND FOURTH ANNUAL MEETING OF PROTEOMICS SOCIETY (INDIA)

NOVEMBER 22-24, 2012

Objective

The last decade has witnessed a revolution in proteomics, primarily due to dramatic improvements in mass spectrometric technologies. This has facilitated a better understanding of proteins in terms of their post-translational modifications, cell localization and also protein : protein or protein : ligand interactions. A major feature of the new wave is the ability of mass spectrometry to give quantitative data. The objective of this meeting is to provide a platform to discuss these new developments in proteomics/mass spectrometry that look beyond mere protein/peptide identification.

Themes

- ◆ Protein chemistry and Chemical proteomics
- ◆ Post translational modifications and Protein interactions
- ◆ Quantitative and Functional Proteomics in human diseases
- ◆ Plant Proteomics and Proteogenomics
- ◆ Structural proteomics and Bioinformatics
- ◆ New developments in mass spectrometry and proteomic technologies
- ◆ Discussion - Methods, Approaches, and Proteomics Standards
