Welcome bundle offer*

From routine QC to research applications, Agilent 6120B Single Quadrupole LC/MS Systems deliver unmatched analytical performance and proven day-after-day reliability. Available with performance characteristics to match your needs and budget, they offer best-in-class data quality in a space-saving benchtop package.

To maximize your return on investment, the performance capabilities of Agilent 6120B LC/MS systems can be easily upgraded to keep pace with your future requirements. The easy-to-use 6120B platform gives you the capability to:

- Routine Mass Identification and quantitation
- Cleaning validation in pharmaceuticals
- Open access analysis in drug discovery and medicinal chemistry
- Orthogonal method development approach in addition to DAD

A compact and sensitive mass spectrometer with

- Wider mass range up to 2000 Da
- Ion source flexibility
- Faster scan speed of 10,400 Da/ Sec
- Ensure future upgradability
