

We announce the formation of the

FLUORESCENCE SOCIETY

FLUORESCENCE SOCIETY (India) is a non-profit association of scientists involved in optics-based research in biology, chemistry and materials science. The society originated from the series of National Fluorescence and Raman workshops, which are being held every year since 2009. The society plans to continue this unique series of annual hands-on workshops, which combines hands-on teaching and research talks at the forefront of the domain, and spread out related activities throughout the year. The 2016 Optics Within Life Sciences (OWLS) international meeting is being organized by the **FLUORESCENCE SOCIETY**, and will be held in Mumbai in March 2016.

Join us and be part of a new movement where members help each other to be more creative with LIGHT!

Visit us at <http://fluorescenceindia.org/> for membership. Membership benefits includes preferential access to many international events and instrument building workshops.

Office bearers: G. Krishnamoorthy (President), Sudipta Maiti (Joint Secretary), Sobhan Sen (Joint Secretary), Anindya Dutta (Treasurer)
