

Fredrick Institute of Plant Protection And Toxicology (FIPPAT)

Research center committed for plant, animal and environment protection

Recognised by

DSIR of the Ministry of Science and Technology, Government of India

Affiliated to

University of Madras, Chennai
The Tamil Nadu Dr.MGR Medical University, Chennai
Tamil Nadu Veterinary and Animal Sciences University, Chennai
Hiroshima University, Japan

Research activities

Toxicology

- Acute, Subacute and Chronic toxicity
- Genetic, Immunotoxic, Neuro and Reproductive toxicity
- Carcinogenic risk, Molecular toxicity, Biomonitoring by molecular methods
- Sub clinical toxicity and Efficacy studies in animal models with drugs and herbal medicinal preparations

Pesticide Chemistry

- Residue in food, agro exports and environmental substrates, formulation analysis, storage stability and chemical analysis/equivalence
- Bio-availability of drugs and pharmaceuticals

Efficacy

- Lab and Field studies

FIPPAT carries out studies as per GLP standards - Data audited by British Governmental Agencies for GLP/GAP compliance
