Offer BRUKER Nuclear Magnetic Resonance (NMR), Electron Spin Resonance (ESR), FT-Infrared (FTIR), TOF Mass Spectrometers, Superconducting and electromagnets which are already installed in many leading Research Laboratories in India.

BRUKER range covers:

- High resolution liquid samples NMR (with CPMAS), 200–800 MHz, with superconducting magnets.
- Solid state NMR (with CPMAS) with superconducting magnets.
- NMR with superconducting magnets for micro and miniimaging (also Whole Body MRI).
- Tabletop low resolution NMR with permanent magnets for applications in food, chemical industries and agriculture.
- ESR and FTEPR spectrometers (with electro and supercon magnets) and tabletop (permanent magnet ESR) for radiation detection in food industry, etc.
- FTIR spectrometers in far, mid and near IR regions.
- FTRaman spectrometers (standalone or attachable to FTIR).
- TOF Mass spectrometers
- Electromagnets and superconducting magnets.

Regd Office: 3, Dayasagar, Gokudham, Goregaon (East), Mumbai 400 063.
