**CALL FOR APPLICATIONS FOR BEAMTIME ALLOCATION
ON ITALIAN SYNCHROTRON RADIATION SOURCE, ELETTRA**

The Department of Science & Technology (DST), together with the Italian Ministry of Foreign Affairs, is promoting the use of beamlines at Italian synchrotron source, Elettra, at Trieste by the Indian scientific community under the Indo-Italian Programme of Cooperation (POC) in Science & Technology 1998–2001. DST invites proposals for experiments on these beamlines.

Elettra is a third generation 2 GeV Synchrotron Radiation Source of high brilliance and offers intense VUV, soft and hard X-ray beams using bending magnets, undulators and wigglers. Proposals can be made for experiments on the following ten beamlines:

- i) Super ESCA (Beamline 2.2 R)
- ii) ESCA Microscopy (Beamline 2.2 L)
- iii) VUV Photoemission (Beamline 3.2 R)
- iv) Spectromicroscopy (Beamline 3.2 L)
- v) Circularly Polarized Light (Beamline 4.2 R)
- vi) Hard X-ray Diffraction (Beamline 5.2 R)
- vii) Small Angle X-ray Scattering (Beamline 5.2 L)
- viii) Gas Phase Photoemission (Beamline 6.2 L)
- ix) Synchrotron Radiation for Medical Physics – SYRMEP (Beamline 6.1 R)
- x) Surface Diffraction (Beamline 7.2 R)

Further details of beamlines are available at the internet web address <http://www.elettra.trieste.it>. They can also be got by writing to Smt Sadhana Relia, Scientist F, International Division, Department of Science & Technology (DST), Technology Bhawan, New Mehrauli Road, New Delhi 110 016 (Fax No. 011-6862418).

Typical experiment at Elettra would take about a week and request for up to three scientists per experiment may be considered for experiments longer than 3 days (9 shifts). For experiments less than 9 shifts, visit of not more than two scientists will be considered. Scientists are encouraged to contact the Elettra beamline coordinator prior to making proposal or revising the proposal. The list of scientist-in-charge of Elettra beamlines could be obtained from DST. Collaborative experiments with Italian and other local groups at Elettra can also be proposed.

The scientists are requested to send their proposal (one in original and 15 additional copies) to DST by 30 June 2000.

The applications invited under this advertisement will be subject to an initial scrutiny within India by DST through an 'Expert Committee' followed by another round of evaluation by 'Elettra Scientific Review Committee'. All revised proposals should also be submitted through DST only with clear statement of reasons for resubmission and a copy of comments from Elettra, if any.

As per the present policy of Sincrotrone Trieste, the Indian applicants (selected by DST) will have to submit the Application Form on-line by getting connected to Virtual User Office <http://users.elettra.trieste.it> (Netscape 3, Internet Explorer 4, etc.) with Java Script enabled and forwarding one complete printed version of the same to DST.

Once the Indian proposal (original or revised) qualifies the two-step evaluation, DST will fund the international air travel expenses and medical insurance for period of stay in Italy and the Italian Ministry of Foreign Affairs will provide the daily allowance for the Indian scientist to cover board, lodging and local transport in Italy @ Lit 180,000 under the Indo-Italian POC in S&T.
