**Chairman,**  
Tea Research Association,  
113 Park Street,  
Kolkata 700 016.

## Workshop for Research Fellows and Teachers

It is proposed to hold a workshop for young research fellows and universities teachers so that they can learn various techniques to use state-of-the-art high pressure equipments (Piston Cylinder and Multi-Anvil high pressure apparatus). In this workshop they can, not only learn efficient ways of handling these equipments but can also visit this institute in future to work on specific problems related to mantle processes and genesis of rock systems in which they are interested. In this workshop they will study a synthetic or natural kimberlite sample at variable temperatures and pressures up to 60 kbar. Ten participants would be chosen on merit basis. For application form please write to the Director at the following address:

Please apply within 7 days of appearance of this advertisement.
