

## NCBS Neurobiology Symposium 2003

January 3 to 6, 2003 Organised by National Centre for Biological Sciences

### NETWORKS & BEHAVIOUR

Over the past couple of decades a framework has emerged to study the neuronal substrates of behaviour at multiple levels of neural organisation. While there has been an explosion of data at individual levels, the challenge now is to integrate across levels. The focus of this symposium is to understand how emergent properties of molecular and cellular networks contribute to information processing at the systems and behavioural levels.
