

Span Diagnostics Ltd. is a pioneer manufacturer of high quality diagnostic products for pathology & clinical laboratories in India. The fastest growing diagnostic company, with a successful track record of over 3 decades having Asia's largest state-of-the-art ISO-9001:2000, WHO cGMP accredited advanced manufacturing facilities with marketing activities across India and 45 countries worldwide, has following requirements:

**PROJECT MANAGER – Specialty Chemicals (Code: PMS)**

To lead a team of M.Sc. & Ph.D. level chemists performing synthesis, purification and analysis of unique organic molecules under collaboration of our USA partner, in our newly launched division. The candidate must be Ph.D. with Synthetic Organic Chemistry having industrial experience of minimum of 5 years, in multi step synthesis and knowledge of modern Synthetic and Analytical methods. Familiarity with purification and characterization techniques such as TLC, flash column chromatography, GL, HPCL and NMR is required.

**PLANT BIOTECHNOLOGIST (Code: PB)**

The candidate must be M.Sc. or Ph.D. with Botany having 2 to 4 years of hands-on experience in large-scale tissue culture of plants. He must have an aptitude for R&D to create improved varieties of commercial plants.

An attractive package with excellent perks, residential accommodation and other corporate benefits will be offered, commensurate with qualification, experience and track record. Please send or email your detailed resume, stating code in the subject line, within 15 days to

Director
