- ACKNOWLEDGEMENTS. We thank the MOEF, GOI for supporting this project as well as climate change research activities at the Centre for Ecological Sciences, Indian Institute of Science, Bangalore. We also thank Jayant Sathaye and Ken Andrasko for their support in our climate change research over the years.
- Received 12 July 2007; revised accepted 22 May 2008

## Erratum

### Sago starch: An economical substitute for *in vitro* primary screening of starch utilizing microorganisms

R. B. Binky, R. Saikiran, S. Tushar, P. Umesh, J. Yogesh and A. N. Syed  
[*Curr. Sci.*, 2007, **93**, 459–461]

Line 1, para 2, 2nd column should have been:

1. Successful use of isabgol derived from *Plantago ovata* seeds, gum katira exuded from *Cochlospermum religiosum* bark and guar gum from endosperm of *Cyamopsis tetragonoloba* as gelling agent has been reported for microbial culture media<sup>3,6,7</sup>.
2. Nene, Z. L. in ref. 6 should have been Nene, Y. L.

We regret the error.
